Dear Russell Crane,

The Missouri Department of Natural Resources has enclosed Missouri's 34th funding request through the Volkswagen Environmental Mitigation Trust (Project ID: Cat 1-EMA2 FY22-001). The enclosure is to fulfill the requirement of a hard copy as required by paragraph 5.2 of the Trust Agreement. Also, the department is sending this D-4 submission electronically through Intralinks.

Thank you for attention to this matter. If you have any questions regarding this submission, please contact Shelly Reimer, with the department's Air Pollution Control Program at P.O. Box 176, Jefferson City, MO 65102 or by phone at (573) 526-1836 or email at shelly.reimer@dnr.mo.gov.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

SUMMARY

Eligible Mitigation Action Type	<input checked="" type="checkbox"/> Appendix D-2 item (specify): <u>Item 2: Class 4-8 School Bus, Shuttle Bus, or Transit Bus (Eligible Buses)</u> <input type="checkbox"/> Item 10 - DERA Option (5.2.12) (specify and attach DERA Proposal):
Explanation of how funding request fits into Beneficiary's Mitigation Plan (5.2.1):	<p>Missouri's BMP allocated \$12 million to school bus replacements. This funding request will fund school bus replacements throughout the state. The project will reduce NO_x emissions and help upgrade the state's school bus fleet. The main benefactors of the project will be school-aged children.</p>
Detailed Description of Mitigation Action Item Including Community and Air Quality Benefits (5.2.2):	<p>School bus replacements reduce NO_x emissions. School buses operate five days a week in highly populated areas. Newer buses are safer, more fuel-efficient, require less maintenance, and are over 90 percent cleaner than older school buses. Cleaner school bus emissions mean significantly less acute exposure to concentrated diesel emissions for students and drivers.</p>
Estimate of Anticipated NO_x Reductions (5.2.3):	<p>Per Missouri's BMP, the department estimates that the \$12 million dedicated to school bus projects will achieve an estimated 80-120 tons of lifetime NO_x emission reductions. This funding request represents approximately 45 percent of the total funding Missouri has dedicated to school buses. Based on this percentage, the projects funded through this funding request will achieve an estimated 36-54 tons of lifetime NO_x emission reductions. The department will calculate the emission reductions from each individual project implemented based on the characteristics of the actual buses replaced and include the calculated emission reductions in the semi-annual reports the department will submit to the trustee.</p>
Identification of Governmental Entity Responsible for Reviewing and Auditing Expenditures of Eligible Mitigation Action Funds to Ensure Compliance with Applicable Law (5.2.7.1):	<p>Missouri Department of Natural Resources</p>
Describe how the Beneficiary will make documentation publicly available (5.2.7.2).	<p>The Missouri Department of Natural Resources, as lead agency for the state of Missouri implementing the Environmental Mitigation Plan, has established a webpage on the VW Trust and mitigation actions, https://dnr.mo.gov/env/apcp/vw.</p>
Describe any cost share requirement to be placed on each NO_x source proposed to be mitigated (5.2.8).	<p>The cost share to be covered by fleet owners of projects that receive funds through this funding request varies between twenty to eighty-five percent of the actual cost of the mitigation action based on project- and applicant-specific information.</p>
Describe how the Beneficiary complied with subparagraph 4.2.8, related to notice to U.S. Government Agencies (5.2.9).	<p>On February 28, 2018, the Department notified the Department of Interior, including the National Park Service and U.S. Fish and Wildlife Service, and the Department of Agriculture, including the Forest Service of the availability of VW funds for locations within Missouri. The Department did not receive notice from any federal agency indicating interest in these funds.</p>
If applicable, describe how the mitigation action will mitigate the impacts of NO_x emissions on communities that have historically borne a disproportionate share of the adverse impacts of such emissions (5.2.10).	<p>All of the projects will benefit school-aged children, which are a sensitive population. As a sensitive population, children bear an increased share of the air pollution burden. In addition, some projects may be targeted specifically at school districts that qualify as financially disadvantaged.</p>

Type D	\$100,000 - \$140,000	NA	NA	\$365,000 - \$420,000

The department reviewed invoices for school bus purchases that schools have made in recent funding opportunity programs the department administered. School buses are classified by type that reflects passenger capacity and body style. The type of fuel that powers the engine also affects the price of the bus.
