Dear Mr. Crane,

The Missouri Department of Natural Resources has enclosed Missouri's nineteenth funding request through the Volkswagen Environmental Mitigation Trust (Project ID: Cat 6-EMA7 FY20-001). The department previously sent the enclosed D-4 submission electronically through Intralinks. The enclosure is to fulfill the requirement of a hard copy as required by paragraph 5.2 of the Trust Agreement.

Thank you for attention to this matter. If you have any questions regarding this submission, please contact Emily Wilbur, with the department's Air Pollution Control Program at P.O. Box 176, Jefferson City, MO 65102 or by phone at (573) 751-7840 or email at emily.wilbur@dnr.mo.gov.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

SUMMARY

Eligible Mitigation Action Type	<input checked="" type="checkbox"/> Appendix D-2 item (specify): <u>Item 7: Airport Ground Support Equipment</u> <input type="checkbox"/> Item 10 - DERA Option (5.2.12) (specify and attach DERA Proposal):
Explanation of how funding request fits into Beneficiary's Mitigation Plan (5.2.1):	Missouri's BMP allocates \$2 million to projects for all-electric airport ground support equipment and port cargo handling equipment, which include eligible mitigation action (EMA) categories 7 and 8. This funding request will fund airport ground support equipment projects under EMA category 7 throughout the state. The project will reduce NO _x emissions and reduce gasoline and diesel fuel consumption which are both specific goals listed in Missouri's BMP.
Detailed Description of Mitigation Action Item Including Community and Air Quality Benefits (5.2.2):	All-electric repowers and replacements for airport ground support equipment reduce NO _x emissions and have a co-benefit of reducing particulate matter. This project will reduce local diesel emissions exposure, while also decreasing regionally transported NO _x pollution that contributes to the formation of ground-level ozone pollution. Encouraging all-electric upgrades for this type of equipment will reduce operation and maintenance costs thus increasing the airport's sustainability and encouraging more investment in these types of projects in the future.
Estimate of Anticipated NO_x Reductions (5.2.3):	Per Missouri's BMP, the department estimates that the \$2 million dedicated to all-electric repowers and replacements for airport ground support equipment and port cargo handling equipment will achieve an estimated 100-150 tons of lifetime NO _x emission reductions. This funding request represents approximately 50 percent of the total funding Missouri has dedicated to these types of projects. Based on this percentage, the projects funded through this funding request will achieve an estimated 50-75 tons of lifetime NO _x emission reductions. The department will calculate the emission reductions from each individual project implemented based on the characteristics of the actual equipment repowered or replaced and include the calculated emission reductions in the semi-annual reports the department will submit to the trustee.
Identification of Governmental Entity Responsible for Reviewing and Auditing Expenditures of Eligible Mitigation Action Funds to Ensure Compliance with Applicable Law (5.2.7.1):	Missouri Department of Natural Resources
Describe how the Beneficiary will make documentation publicly available (5.2.7.2).	The Missouri Department of Natural Resources, as lead agency for the state of Missouri implementing the Environmental Mitigation Plan, has established a webpage on the VW Trust and mitigation actions, https://dnr.mo.gov/env/apcp/vw .
Describe any cost share requirement to be placed on each NO_x source proposed to be mitigated (5.2.8).	The minimum cost share to be covered by government-owned fleets under this funding request will be twenty-five percent of the actual cost of the mitigation action. The minimum cost share to be covered by private fleets under this funding request will be fifty percent of the actual cost of the mitigation action. Some fleet owners may cover more than these minimum amounts.
Describe how the Beneficiary complied with subparagraph 4.2.8, related to notice to U.S. Government Agencies (5.2.9).	On February 28, 2018, the Department notified the Department of Interior, including the National Park Service and U.S. Fish and Wildlife Service, and the Department of Agriculture, including the Forest Service of the availability of VW funds for locations within Missouri. The Department did not receive notice from any other federal agency indicating interest in these funds.
If applicable, describe how the mitigation action will mitigate the impacts of NO_x emissions on communities that have historically borne a disproportionate share of the adverse impacts of such emissions (5.2.10).	Airport equipment operates in areas where tens or hundreds of pieces of gas or diesel-powered equipment operate and are often located in urban cores that bear a disproportionate amount of the air pollution burden. These projects will help reduce emissions in these areas with higher concentrations of NO _x emissions.
