

APPENDIX D-4
Beneficiary Eligible Mitigation Action Certification

BENEFICIARY ELIGIBLE MITIGATION ACTION CERTIFICATION

Beneficiary: State of Florida

Lead Agency Authorized to Act on Behalf of the Beneficiary: Florida Department of Environmental Protection
(Any authorized person with delegation of such authority to direct the Trustee delivered to the Trustee pursuant to a Delegation of Authority and Certificate of Incumbency)

Action Title:	Florida - Class 4-7 Garbage Truck Projects
Beneficiary's Project ID:	VW401 through VW415 (15 total projects funded)
Funding Request No.	(sequential) 7
Request Type: (select one or more)	☐ Reimbursement ☒ Advance ☐ Other (specify): _____
Payment to be made to: (select one or more)	☒ Beneficiary ☐ Other (specify): _____
Funding Request & Direction (Attachment A)	☒ Attached to this Certification ☐ To be Provided Separately

SUMMARY

Eligible Mitigation Action Appendix D-2 item - Eligible Mitigation Action #6 - Class 4-7 Truck Replacement Projects. Action Type: Replacement of eligible Class 4-7 medium trucks (2009 or older units with new diesel or CNG garbage truck units).
Explanation of how funding request fits into Beneficiary's Mitigation Plan (5.2.1): Florida's Amended Beneficiary Mitigation Plan (BMP) (dated Oct. 31, 2025) authorizes projects under EMA #6 (p. 4, 26, 27).
Detailed Description of Mitigation Action Item Including Community and Air Quality Benefits (5.2.2): Replacement of 41 high emitting diesel medium truck units (Class 4-7; 2009 or older) with 41 new, well controlled diesel or CNG trucks for use in waste hauling or waste stream management (e.g. "garbage trucks"). This effort is in accordance with Florida's amended BMP, which focuses on diesel emission reduction projects for units used in community service and disaster management to reduce diesel emissions and improve local resiliency. Per EPA's Diesel Emissions Quantifier, such Class 4-7 truck replacements can yield diesel particulate and NOx reductions of over 60% for diesel units and 80% for CNG units.
Estimate of Anticipated NOx Reductions (5.2.3): According to EPA's Diesel Emissions Quantifier and related literature, representative medium truck (Class 4-7) replacement projects (unit model years 2009 and older) can result in diesel particulate and NOx emission reductions of over 60% for diesel units and 80% for CNG units.
Identification of Governmental Entity Responsible for Reviewing and Auditing Expenditures of Eligible Mitigation Action Funds to Ensure Compliance with Applicable Law (5.2.7.1): Florida Department of Environmental Protection (DEP).
Describe how the Beneficiary will make documentation publicly available (5.2.7.2). DEP maintains a webpage that provides background resources and current information about the Mitigation Trust. Additionally, DEP manages an electronic mailing subscription service to provide notices and information to all subscribers. All pages are navigable from the main webpage at www.FloridaDEP.gov/volkswagen .
Describe any cost share requirement to be placed on each NOx source proposed to be mitigated (5.2.8). Governmental grantees (13 projects) will not be required to contribute a cost-share for projects totaling \$11.1 million in funding (36 garbage truck replacements). Private partner grantees (2 projects) will contribute a minimum of 75% of the total cost for each project (for a total cost-share contribution of \$1.5 million for 5 garbage truck replacements for \$500,000 in grant funding). This is consistent with the minimum cost-share requirements allowable under the VW Settlement.
Describe how the Beneficiary complied with subparagraph 4.2.8, related to notice to U.S. Government Agencies (5.2.9). On February 22, 2018, DEP sent notice via ground mail and electronic mail to the representatives of the U.S. Department of Agriculture, and the U.S. Department of the Interior listed in subparagraph 4.2.8 of the Final Trust Agreement.

If applicable, describe how the mitigation action will mitigate the impacts of NOx emissions on communities that have historically borne a disproportionate share of the adverse impacts of such emissions (5.2.10).
The 15 projects that will be funded through this mitigation action include projects in specific areas of the state engaged in disaster recovery and resiliency planning (i.e., upgrades to legacy municipal service vehicles to address present and projected needs relating to hurricane and natural disaster preparedness and response), in communities that have suffered disproportionate economic, environmental, and operational impacts from severe weather events in recent years, and 12 of the 15 projects are also located in Air Quality Priority Areas as defined in Florida's BMP.

CERTIFICATIONS

By submitting this application, the Lead Agency makes the following certifications:

- 1. This application is submitted on behalf of Beneficiary State of Florida, and the person executing this certification has authority to make this certification on behalf of the Lead Agency and Beneficiary, pursuant to the Certification for Beneficiary Status filed with the Court.**
- 2. Beneficiary requests and directs that the Trustee make the payments described in this application and Attachment A to this Form.**
- 3. This application contains all information and certifications required by Paragraph 5.2 of the Trust Agreement, and the Trustee may rely on this application, Attachment A, and related certifications in making disbursements of trust funds for the aforementioned Project ID.**
- 4. Any vendors were or will be selected in accordance with a jurisdiction's public contracting law as applicable. (5.2.5)**
- 5. Beneficiary will maintain and make publicly available all documentation submitted in**

support of this funding request and all records supporting all expenditures of eligible mitigation action funds subject to applicable laws governing the publication of confidential business information and personally identifiable information. (5.2.7.2)

Eligible Mitigation Action Management Plan – Project Management Plan

Implementation and Expenditures Timeline – Project Schedule and Milestones

Milestone	Estimated Start/End Date
DEP Publishes Notice of Funding Availability for potential Class 4-7 medium truck diesel emissions mitigation projects	11/24/2025
DEP Reviews Applications	12/30 2025
DEP Notifies Applicant(s) of Award	1/12/2026
DEP Develops and Executes Grant Agreement with Grantees	March - July 2026
Grantees Commence Work on Enumerated Deliverables	March 2026
Grantee Submits Final Deliverable (Scrapping Certificate)	July 2026 - March 2027
Grantee Submits Reimbursement Request to DEP	July 2026 - March 2027
DEP Reimburses Grantee/Grant Close-Out	October 2026 - April 2027
Project Completion Date	Summer 2027

Budget Narrative

As noted in the timeline above, DEP has completed its review of project proposals received through the Notice of Funding Availability (NOFA) for the replacement of eligible (model year 2009 and older) Class 4-7 medium trucks with new Class 4-7 diesel or compressed natural gas (CNG) municipal service trucks (e.g., garbage trucks, waste hauling trucks, claw trucks, dump trucks). As reflected in the attached documentation, consistent with the terms and conditions of Florida's BMP under the VW Settlement and Environmental Mitigation Trust, DEP published a NOFA Application Worksheet for potential project partners to propose eligible Class 4-7 diesel trucks for replacement with new garbage trucks (diesel, compressed natural gas [[CNG], propane, or electric). Eligible program participants include Florida county governments, Florida municipalities, and non-governmental private commercial entities that provide waste collection services for a Florida county or municipality under contract. DEP has identified 15 projects that provide high emissions benefits, which can be completed in a timely manner, and which are in the cost range appropriate for the target total funding amount (originally \$10 million; raised to \$11.5 million based upon receipt of eligible applications during the application period). At present, DEP anticipates that all 15 of these projects will be completed by March 2027, with no project activities extending beyond calendar year 2027. DEP is in the process of developing grant agreements detailing the specific timelines and schedules of values for each of these projects. DEP will not use any trust funding for DEP staff compensation or any other administrative costs. All trust funding will be paid directly to project partners as reimbursements for the purchase price of new units (up to \$400,000 per unit for governmental grantees [not to exceed 100% of the purchase price] and up to \$100,000 per unit for private sector grantees [not to exceed 25% of the purchase price]). Grantees will scrap one eligible unit for each new unit funded under the grant agreement.

Attachment C

Detailed Plan for Reporting on Eligible Mitigation Action Implementation

As set forth in subparagraph 5.2.11 of the Environmental Trust Agreement for State Beneficiaries (Final Trust Agreement), Beneficiaries must set for a “detailed plan for reporting on Eligible Mitigation Action implementation” to be included in an Appendix D-4 funding request. The Florida Department of Environmental Protection intends to report based on the obligations set forth in 5.3 of the Final Trust Agreement, seen below:

5.3 Beneficiary Reporting Obligations: For each Eligible Mitigation Action, no later than six months after receiving its first disbursement of Trust Assets, and thereafter no later than January 30 (for the preceding six-month period of July 1 to December 31) and July 30 (for the preceding six-month period of January 1 to June 30) of each year, each Beneficiary shall submit to the Trustee a semiannual report describing the progress implementing each Eligible Mitigation Action during the six-month period leading up to the reporting date (including a summary of all costs expended on the Eligible Mitigation Action through the reporting date). Such reports shall include a complete description of the status (including actual or projected termination date), development, implementation, and any modification of each approved Eligible Mitigation Action. Beneficiaries may group multiple Eligible Mitigation Actions and multiple sub-beneficiaries into a single report. These reports shall be signed by an official with the authority to submit the report for the Beneficiary and must contain an attestation that the information is true and correct and that the submission is made under penalty of perjury. To the extent a Beneficiary avails itself of the DERA Option described in Appendix D-2, that Beneficiary may submit its DERA Quarterly Programmatic Reports in satisfaction of its obligations under this Paragraph as to those Eligible Mitigation Actions funded through the DERA Option. The Trustee shall post each semiannual report on the State Trust’s public-facing website upon receipt.

Attachment D

Detailed Cost Estimates from Selected or Potential Vendors for Each Proposed Expenditure

The total project cost estimate for the fifteen (15) projects addressed in this funding request has a ceiling of \$13,212,000. The estimated cost per new replacement Class 4-7 municipal service truck (e.g., "garbage trucks" used in solid waste hauling and or solid waste handling) range from approximately \$139,000 to over \$400,000. Grantees provided cost estimates and associated documentation to DEP during the project application period. Grantees selected the make, model, and features of the truck(s) for which they sought funding based upon specific needs within their municipal service fleets.

Based on public information provided, this range of prices is the best current estimate for Class 4-7 municipal service trucks that are most common for the size and scope of the project that DEP intends to fund. Representative vendor quotes and unit descriptions are attached, and an average unit cost is reflected in the summary table below. (NOTE: DEP calculated this average unit cost based upon vendor-specific information provided to date. Based upon current unit cost projections, for 41 total units across 15 projects the average cost is \$322,243.90 per unit.)

DEP is making one funding request for the cumulative project funding costs associated with these fifteen (15) projects. DEP is requesting \$11,500,000 in Mitigation Trust funds for DEP's Class 4-7 Garbage Truck grant project.

Budget Category	Estimates
Freight	0.00
Labor	0.00
Equipment & Supplies (41 eligible Class 4-7 municipal service trucks)	\$322,243.90 (x 41)
Overhead	0.00
Fringe Benefits	0.00
Travel	0.00

Labrie Side Loaders

Environmental Products would like to thank you for the opportunity to present the **Labrie Automizer Right-Hand Side Loader**.

Environmental Products Group is the sole provider of Labrie Equipment in the state of Georgia, as well as many other leading industry product lines including: Vactor sewer Cleaners, Elgin Street Sweepers, TRUVAC Hydro Excavation Equipment, Envirosight Pipeline Inspection Cameras, Petersen Grapple Loaders, PB Asphalt Pothole Patchers, Madvac Sweepers and Vacuums, and a host of parts, tools and accessories for all your needs.

Environmental Products Group prides itself on our local parts, service, and training capabilities. With multiple full-service locations throughout Florida, Georgia, Tennessee. Including Vactor, Elgin, TRUVAC, and Envirosight repair centers, Extensive parts inventory, factory-trained technicians, mobile parts and service, rentals, turnkey maintenance packages, leasing options, and much more... we are ready to service your every need.

EP Rents is a division of Environmental Products Group, EP Rents specializes in rental trucks when you need them. With a large inventory of Vactor Sewer Cleaners and Trailer Jetters, Elgin Sweeper, Envirosight Pipeline Inspection Cameras, Petersen Grapple Loaders. Call us for any of your rental needs.

Thank you for your consideration.

Product Description

- The Automizer™ Right-Hand side loader features a strong, light-weight body with a reliable loading arm that can reach farther than any other automated side loader.

Parked cars and other obstacles are no longer an obstacle with an arm that can reach 12-feet and lift up to 1,000 pounds fully extended.

Thanks to carefully engineered hydraulics, this arm maneuvers both smoothly and with exacting precision.

Standard Features

- Heavy Duty Arm & Gripper, "32 to 95 US gal
- Spill shield on Gripper
- Auxiliary Arm (or Mast) Controls Inside Cab on Curbside
- Hydraulic Oil Cooler
- Add. Lights on Tg.: 2/3 Lightbar + Central Brake Light + Multifunctions Lights (4) (X Pattern)
- Work Light Package - LED (2)
- 4X Envirolink Camera(s) - 4X Standard Position(s) With Heater/Without Shutter
- Body floor liner Full Length x 4mm (0.160") - Hardox 450
- Hopper Floor Liner 1/4" - Hardox 450
- Hopper Side Wall Liners 4mm (0.160") - Hardox 450
- Centralized Grease Point for Follower Panel Rollers
- Ground Level Grease Points for Tailgate (Centralized) & Hopper Door(s)

Class 4-7 Garbage Truck Project Application Worksheet

Project Description

Consistent with the terms and conditions of Florida's State Beneficiary Mitigation Plan under the Volkswagen (VW) Settlement and VW Environmental Mitigation Trust,¹ this Notice of Funding Availability (NOFA) Application Worksheet is for potential project partners to propose eligible Class 4-7 diesel trucks (engine model year 2009 or older) for replacement with new garbage trucks (diesel, compressed natural gas [CNG], propane, or electric). Eligible program participants include Florida county governments, Florida municipalities, and non-governmental private commercial entities that provide waste collection services for a Florida county or municipality under contract.

Each entity may request funding for up to a maximum of three (3) new garbage trucks per Application. As stated in the Updates and Amendments to Florida's Beneficiary Mitigation Plan under the Volkswagen Settlement, dated October 31, 2025,² the Department will prioritize funding awards to projects in areas of the state engaged in disaster recovery and resiliency planning (i.e., fleet management and upgrades to legacy vehicles and equipment to address present and projected needs relating to hurricane and natural disaster preparedness and response), and in communities that have suffered disproportionate economic, environmental, and operational impacts from severe weather events in recent years, which would also benefit from reductions in diesel-related emissions. The Department will also prioritize funding for projects located in rural areas of opportunity as defined under Section 288.0656, Fla. Stat.

Qualifying governmental entities may be awarded up to \$400,000 per eligible new unit, subject to the limits of available funds and the goal of awarding funds to as many qualifying governmental entities as possible. Qualifying non-governmental private commercial entities may be awarded up to \$100,000 per eligible new unit, subject to the limits of available funds. To be eligible, a qualifying entity must purchase one new garbage truck (diesel, compressed natural gas [CNG], propane, or electric) for each eligible existing unit

¹ Florida's Beneficiary Mitigation Plan (dated October 2019) is available for download at:
<https://floridadep.gov/air/air/documents/floridas-beneficiary-mitigation-plan>.

² Florida's Beneficiary Mitigation Plan Updates and Amendments (dated October 31, 2025) is available for download at: <https://floridadep.gov/air/air-business-planning/documents/florida%E2%80%99s-beneficiary-mitigation-plan-updates-amendments-under>.

scrapped. Eligible existing units do not have to be garbage trucks. Eligible existing units may be any Class 4-7 medium truck of model year 2009 or older. Grant funds will be paid to the grantee in the form of a reimbursement following the completion of all grant requirements. Scrappage requirements will apply as specified in Florida's Beneficiary Mitigation Plan.

The State of Florida intends for all projects funded under this NOFA to be completed no later than December 31, 2027. Funding priority will be based, in part, upon the date by which the grantee proposes to complete the project. All interested parties must complete and submit this application worksheet to VWMitigation@FloridaDEP.gov by **Tuesday, December 23, 2025, at 5:00 p.m. EST.**

Once the application period has closed and the Department has completed its review of all applications, the Department will prepare award letters for potential project partners followed by draft grant agreements for review prior to execution by the Department and the grantee. Each grant agreement will include specific deliverables (i.e., make, model, unit specifications, and total unit cost for each new unit) and information pertaining to the process by which the grantee must scrap (e.g., permanently disable) each eligible existing unit. Each grant agreement will include a detailed scope of work, timeline, and payment schedule.

The total amount of funding available for potential distribution to qualifying entities under this NOFA is \$10,000,000.³ The maximum potential grant award for any individual qualifying entity operating within a specified county or municipality will be \$1,200,000 for governmental entities (for three replacement units at \$400,000 per unit) and \$300,000 for non-governmental / private commercial entities (for three [3] replacement units at \$100,000 per unit). Non-governmental private commercial entities that provide waste collection services to governmental entities under contract, and which operate in more than one county or municipality, may apply separately for funding for unit replacement projects within each separate county or municipality in which that entity provides services.

The Department reserves the right to prioritize the distribution of project funding to governmental entities ahead of non-governmental private commercial entities. The Department reserves the right to distribute project funding to as many qualifying entities as possible.

³ The Department reserves the right to make additional VW Settlement funds available for the purchase of new Class 4-7 garbage trucks if there is sufficient interest in this NOFA.

General Information
The applicant a governmental entity ____ / non-governmental private commercial entity ____.
County or municipality in which the applicant operates its fleet:
Is the proposed project located in a rural area of opportunity as defined under s. 288.0656, Fla. Stat.?
Total number of diesel garbage trucks in the applicant's fleet operating within that county or municipality:
Are the existing units that the applicant is proposing to scrap Class 4-7 trucks that are model year 2009 or older?
Is the applicant aware that in order to receive reimbursement for costs associated with purchasing each new unit, a 3" hole must be bored through the engine block of an eligible existing unit and the frame rails of the eligible existing unit must be cut completely in half?
Please identify the fuel type that the applicant is proposing for the replacement unit(s): ____ Diesel ____ Compressed Natural Gas (CNG) ____ Propane ____ Electric
Number of eligible existing units to be replaced (up to three [3]):
Estimated cost per new unit:
Total project funding requested:
Proposed date by which the applicant will complete all project activities:

Individual Class 4-7 Truck Details (for up to three [3] eligible existing units)				
Engine Model-Year	Class (4-7)	Annual Miles Traveled (estimated)	Annual Gallons of Fuel Used (estimated)	Annual Idling Hours (estimated)

NOTE: The applicant may elect to submit this information as a spreadsheet attachment to the Application Worksheet.

the establishment of the dealership, subject to the applicant's compliance with the provisions of Chapter 320, Florida Statutes.

DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

Division of Motor Vehicles

**Establishment of Golf Coast Carts of Naples, line-make PLDG
Notice of Publication for a New Point Franchise Motor Vehicle
Dealer in a County of More than 300,000 Population**

Pursuant to section 320.642, Florida Statutes, notice is given that Plastic Development Group LLC, intends to allow the establishment of Golf Coast Carts of Naples, as a dealership for the sale and service of low-speed vehicles manufactured by Plastic Development Group LLC (line-make PLDG) at 7273 Vanderbilt Beach Road # 24, Naples, (Collier County), Florida 34119, on or after December 24, 2025.

The name and address of the dealer operator(s) and principal investor(s) of Golf Coast Carts of Naples are dealer operator(s): Michael Rizzi, 7273 Vanderbilt Beach Road # 24, Naples, Florida 34119; principal investor(s): George Vukobratovich, 7273 Vanderbilt Beach Road # 24, Naples, Florida 34119.

The notice indicates intent to establish the new point location in a county of more than 300,000 population, according to the latest population estimates of the University of Florida, Bureau of Economic and Business Research.

Certain dealerships of the same line-make may have standing, pursuant to section 320.642, Florida Statutes, to file a petition or complaint protesting the application.

Written petitions or complaints must be received by the Department of Highway Safety and Motor Vehicles within 30 days of the date of publication of this notice and must be submitted to: Sondra L. Howard, Administrator, Dealer License Section, Department of Highway Safety and Motor Vehicles, Room A-312 MS65, Neil Kirkman Building, 2900 Apalachee Parkway, Tallahassee, Florida 32399-0635.

A copy of such petition or complaint must also be sent by US Mail to: Ann Yousif, Plastic Development Group LLC, 24445 Northwestern Hwy Suite 101, Southfield, Michigan 48075.

If no petitions or complaints are received within 30 days of the date of publication, a final order will be issued by the Department of Highway Safety and Motor Vehicles approving the establishment of the dealership, subject to the applicant's compliance with the provisions of Chapter 320, Florida Statutes.

DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

Division of Motor Vehicles

**Establishment of Gator Golf Carts LLC, line-make PLDG
Notice of Publication for a New Point Franchise Motor Vehicle
Dealer in a County of More than 300,000 Population**

Pursuant to section 320.642, Florida Statutes, notice is given that Plastic Development Group LLC, intends to allow the establishment of Gator Golf Carts LLC, as a dealership for the sale and service of low-speed vehicles manufactured by Plastic Development Group LLC (line-make PLDG) at 2409 N Federal Hwy, Delray Beach, (Palm Beach County), Florida 33483, on or after December 24, 2025.

The name and address of the dealer operator(s) and principal investor(s) of Gator Golf Carts LLC are dealer operator(s): Dane Luca, 2409 N Federal Hwy, Delray Beach, Florida 33483; principal investor(s): Dane Luca, 2409 N Federal Hwy, Delray Beach, Florida 33483.

The notice indicates intent to establish the new point location in a county of more than 300,000 population, according to the latest population estimates of the University of Florida, Bureau of Economic and Business Research.

Certain dealerships of the same line-make may have standing, pursuant to section 320.642, Florida Statutes, to file a petition or complaint protesting the application.

Written petitions or complaints must be received by the Department of Highway Safety and Motor Vehicles within 30 days of the date of publication of this notice and must be submitted to: Sondra L. Howard, Administrator, Dealer License Section, Department of Highway Safety and Motor Vehicles, Room A-312 MS65, Neil Kirkman Building, 2900 Apalachee Parkway, Tallahassee, Florida 32399-0635.

A copy of such petition or complaint must also be sent by US Mail to: Ann Yousif, Plastic Development Group LLC, 24445 Northwestern Hwy Suite 101, Southfield, Michigan 48075.

If no petitions or complaints are received within 30 days of the date of publication, a final order will be issued by the Department of Highway Safety and Motor Vehicles approving the establishment of the dealership, subject to the applicant's compliance with the provisions of Chapter 320, Florida Statutes.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Notice of Funding Availability under Florida's Volkswagen Settlement Diesel Emission Mitigation Program – Class 4-7 Garbage Trucks

Department of Environmental Protection

Division of Air Resource Management

Florida Department of Environmental Protection (Department) announces a Notice of Funding Availability (NOFA) for \$10 million available for the purchase of new Class 4 through Class 7 garbage trucks (powered by diesel, compressed natural gas [CNG], propane, or electric) to replace eligible Class 4-7 diesel trucks of engine model year 2009 or older. Eligible program participants include Florida county governments, Florida municipalities, and non-governmental private commercial entities that provide waste collection services for a Florida

county or municipality under contract. Each entity may be awarded funding for up to three (3) eligible replacement units. Non-governmental private commercial entities that provide waste collection services to governmental clients under contract, and which operate in more than one county or municipality, may apply separately for funding for unit replacement projects within each separate county or municipality in which that entity provides services. As stated in the Updates and Amendments to Florida's Beneficiary Mitigation Plan under the Volkswagen (VW) Settlement, dated October 31, 2025, the Department will prioritize funding awards to projects in areas of the state engaged in disaster recovery and resiliency planning and in communities that have suffered disproportionate economic, environmental, and operational impacts from severe weather events in recent years, which would also benefit from reductions in diesel-related emissions. The Department will also prioritize funding for projects located in rural areas of opportunity as defined under Section 288.0656, Fla. Stat. Qualifying governmental entities may be awarded up to \$400,000 per eligible unit, subject to the limits of available funds and the goal of awarding funds to as many qualifying governmental entities as possible. Qualifying private entities may be awarded up to \$100,000 per eligible unit, subject to the limits of available funds. The Department reserves the right to make additional VW Settlement funds available for the purchase of new Class 4-7 garbage trucks if there is sufficient interest in this NOFA. To be eligible, a qualifying entity must purchase one new Class 4-7 garbage truck (diesel, compressed natural gas [CNG], propane, or electric) for each eligible existing unit scrapped by the entity. Scrappage requirements will apply as specified in Florida's Beneficiary Mitigation Plan. Florida entities that wish to participate in this program should visit the Department's webpage at: <https://floridadep.gov/volkswagen> to download, complete, and submit the application worksheet by Tuesday, December 23, 2025, at 5:00 p.m., EST.

DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE OF AVAILABILITY

FLORIDA CATEGORICAL EXCLUSION NOTICE

WW48029 - Eatonville, FL

The Florida Department of Environmental Protection (DEP) has determined that the Town of Eatonville's project involving Wastewater Collection System Improvements is not expected to generate controversy over potential environmental effects. The total estimated construction cost is \$19,123,100. The project may qualify for a Clean Water State Revolving Fund (CWSRF) loan composed of federal or state funds. DEP will consider public comments about the environmental impacts of the proposed project that are postmarked or delivered at the address below within 30 days of this notice. A full copy of the Florida Categorical Exclusion Notice can be obtained by writing to: Matthew Lopez-Calleja, CWSRF Program, Department of Environmental Protection, 3900 Commonwealth Boulevard, MS#3505, Tallahassee, Florida 32399-3000 or calling (850)245-2199 or emailing to Matthew.LopezCalleja@FloridaDEP.gov.
